01

WHO WE ARE

E-Vision GmbH is a diversified service company based in Germany. We work in energy-related fields and industrial services, offering one-stop solutions for companies setting up or running operations in Germany and neighbouring countries.

With industry experience, a professional team and practical, on-site know-how, we cover the full range from engineering and construction management to procurement, industrial services and dangerous-goods warehousing.

To give customers reliable, efficient support, we operate our own warehousing facilities and dedicated service teams – from forklift operators and assembly workers to project managers.

Since 2017

German GmbH, head office in Willich,
North Rhine-Westphalia

WHAT WE DO

Engineering, Industrial Services, Labour and Logistics

Energy storage, project and construction management, procurement, labour services and dangerous-goods warehousing.

WHO WE SERVE

Companies Building and Operating in Europe

Manufacturers, energy and battery companies and their suppliers setting up in Germany and neighbouring countries.

HOW WE WORK

German, English and Chinese

One contact for the whole project, on site in Germany, in the language of the customer and the local authorities.

02

SCOPE OF BUSINESS

Four business areas, one contact. Each area is covered in detail on the pages that follow.

SERVICE 01

ENERGY STORAGE SYSTEM SERVICES

We support battery energy storage and photovoltaic systems across their full life cycle – from cost analysis to installation, testing and maintenance.

- 1 Life-cycle cost analysis
- 2 Construction and installation of battery energy storage systems
- 3 Maintenance and renovation of photovoltaic and energy storage systems
- 4 Warehouse handling, unpacking and testing of battery modules

SERVICE 02

Project & Construction Management

Planning, coordination and staffing for factory and laboratory projects in Germany – from feasibility study to on-site construction management.

- 1 Project management, concept design and feasibility studies
- 2 Construction management
- 3 Site supervision, HSE coordination and permit handling

SERVICE 03

Procurement & Industrial Services

Sourcing, import and installation of equipment, plus the hands-on services that keep a production site running.

- 1 Import and export; goods and equipment procurement
- 2 Labour and on-site services – cleaning, maintenance, assembly (p. 07)
- 3 Equipment rental – cleaning vehicles, forklifts, aerial work platforms

SERVICE 03 – ON SITE

LABOUR & ON-SITE SERVICES

Our own teams on your site – skilled workers, technicians and operators, managed by us and working to German standards.

01

Forklift & Transport Operators

Certified drivers for internal logistics, loading and yard movements.

02

Technical Cleaning Teams

Factory and machine cleaning with our own equipment and trained staff.

03

Maintenance Technicians

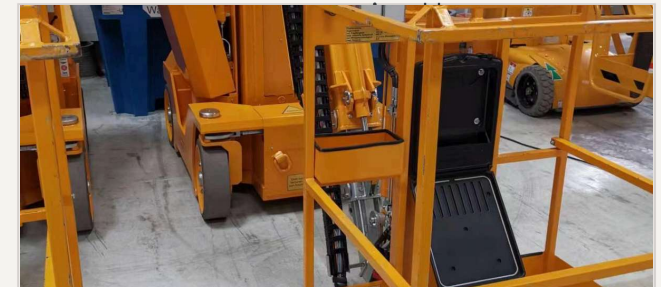

Experienced technicians for the upkeep of production equipment.

04

Assembly Workers & Electricians

Skilled crews for line installation, relocation and commissioning.

05

Production Support Staff

Auxiliary personnel for the production process, incl. catering and accommodation

SERVICE 04

WAREHOUSING & LOGISTICS

End-to-end warehousing and logistics for business customers, e-commerce, general cargo and dangerous goods – from four facilities in Germany, with our own transport and forklift teams.

- 1 Professional warehousing, including dangerous goods
- 2 Order processing, picking, packing and returns
- 3 Last-mile delivery with our own transport team
- 4 Road freight across Europe; container unloading and forklift operation

SERVICE 04 – LOCATIONS

WAREHOUSE NETWORK

Four strategically located facilities in Germany provide scalable storage capacity and efficient logistics support.

TOTAL CAPACITY **52,000 m²+**

SERVICE 04 – SOLUTIONS

WAREHOUSING SOLUTIONS

Compliant with EU and local regulations, run on a warehouse management system for full visibility.

BUSINESS CUSTOMERS

Wholesale & Distribution

Bulk storage and inventory management
Palletizing, labelling and kitting
Scheduled delivery to businesses

GENERAL CARGO

Safe & Secure Warehousing

Dry goods, consumer and industrial goods
Temperature-controlled options
Flexible storage solutions

E-COMMERCE

Fulfilment for Online Retail

Order processing and picking
Packaging and labelling
Fast shipping and returns management

DANGEROUS GOODS

Specialised Handling

Storage in compliant facilities
UN-certified packaging and labelling
Professional handling and documentation

SERVICE 04 – PROCESS

WAREHOUSING & FULFILMENT PROCESS

1	2	3	4	5
Inbound	Storage	Order processing	Shipping	Returns
Receiving and inspection	Inventory and storage	Picking and packing	Dispatch and delivery	Returns handling and restocking

SERVICE 04 – TRANSPORT

EUROPEAN ROAD FREIGHT

Reliable transport across the whole EU – daily connections between key hubs from Amsterdam and Hamburg to Munich, Vienna, Milan and Warsaw.

Full EU coverage

All major countries and regions

Freight network

Daily connections between key locations

Reliable and safe

High security standards for your goods

On-time delivery

Efficient transit times across Europe

03

WHY E-VISION

Professional Team

Engineers, technicians, project managers and skilled workers with deep experience in their fields – and the languages to work with Chinese and German partners alike.

Up-to-Date Technology

We follow the industry's technological development closely and bring current processes and equipment into every project.

Responsive Service

Customer-centric from project consulting to after-sales. One contact, quick answers, on site when needed.

PROJECT REFERENCES

PROJECT	LOCATION	SERVICES PROVIDED
External warehouse project	Magdeburg, Germany	Factory cleaning · fencing & break-room design · equipment procurement · line transport & installation · equipment rental
Production base	Arnstadt, Germany	Employee meal supply · accommodation for staff and suppliers · labour services
Failure-analysis laboratory	Germany	Concept design & feasibility study · equipment supply · labour services
Energy storage project	Netherlands	Warehouse handling · testing-equipment procurement & installation · module testing & unpacking · labour services
Module line handling & placement	Saarland, Germany	Factory equipment transport · installation with assembly workers and electricians

MAGDEBURG, GERMANY

EXTERNAL WAREHOUSE PROJECT

Complete set-up of an external warehouse — from cleaning and fit-out to moving in and installing the production line, with our own teams and equipment.

03 INDUSTRIAL SERVICES

04 LOGISTICS

1

Factory cleaning

Cleaning equipment and professional cleaning personnel

2

Fit-out design and procurement

Fencing, break room, office furniture and equipment

3

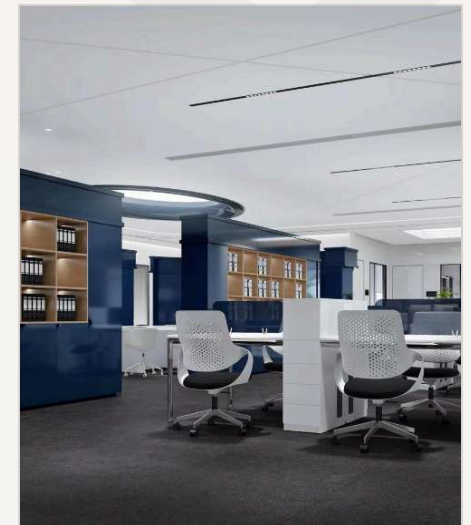

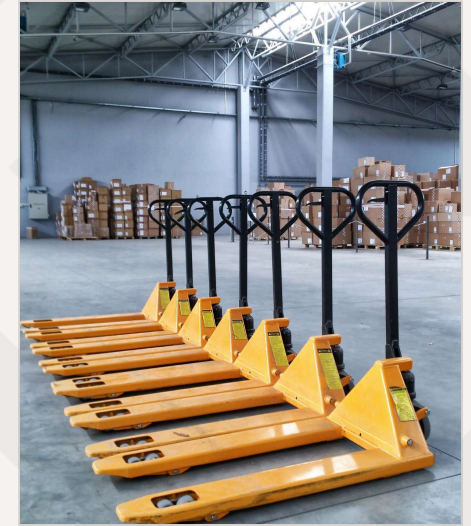

Production line transport and installation

Forklifts, trucks, container unloading; operators and electricians

4

Equipment rental

Factory cleaning vehicles, forklifts and aerial work platforms

**GERMANY**

FAILURE-ANALYSIS LABORATORY

Planning and fit-out of a failure-analysis (FA) laboratory – from the first concept to a fully equipped, staffed facility ready for operation.

02 PROJECT MANAGEMENT**03 PROCUREMENT**

- 1 Concept design and feasibility study**
Layout, process flow and investment planning
- 2 Equipment specification and supply**
Sourcing, import and delivery of analysis and test equipment
- 3 Installation and commissioning support**
Coordination of suppliers and trades on site
- 4 Labour services**
Trained personnel to start operation of the laboratory

NETHERLANDS

ENERGY STORAGE PROJECT

Inbound logistics and testing support for a battery energy storage project – receiving, unpacking and testing modules before installation, with our own warehouse and site teams.

01 ENERGY STORAGE

04 LOGISTICS

- 1 Warehouse handling**
Receipt, storage and staging of modules and components
- 2 Testing equipment**
Procurement and installation of module testing equipment
- 3 Module testing and unpacking**
Incoming inspection and test runs before hand-over
- 4 Labour services**
Operators and technicians provided and managed by E-Vision

**SAARLAND, GERMANY**

MODULE LINE HANDLING AND PLACEMENT

Transport, positioning and installation of production equipment for a module line – placed and connected by our own assembly workers and electricians.

03 INDUSTRIAL SERVICES**04 LOGISTICS**

- 1 Factory equipment transportation**
Heavy-goods transport and internal moves with forklifts and lifting gear
- 2 Positioning and placement**
Precise placement of line modules to the customer's layout
- 3 Installation**
Mechanical assembly and electrical connection by our assembly workers and electricians

05

PARTNERS

Long-term partnerships across energy, manufacturing and logistics, built on the principle of win-win cooperation.
